PROFESSIONAL SUMMARY

- Motivated Bachelor of Computer Applications (BCA) student with hands-on experience in AI/ML, full-stack web development, automation tools, and data-driven applications.
- Proficient in Python, Machine Learning, API integration, and modern development technologies, with experience building real-world projects using Django, Flask, Local LLMs, and AI frameworks.
- Strong problem-solving abilities with practical exposure through internships in AI/ML, Data Analytics, and Django Full Stack Development, demonstrating the ability to learn quickly and deliver innovative solutions.
- Passionate about Artificial Intelligence, Software Development, and emerging technologies, with a focus on developing scalable applications and continuously enhancing technical expertise.

TECHNICAL SKILLS

- Languages: Python, Java, C, SQL
- AI / Machine Learning: Machine Learning, Deep Learning, Neural Networks, Model Integration
- Web Development: Django, Flask, HTML, CSS, JavaScript, API Integration
- LLMs & AI Tools: Prompt Engineering, Local LLMs (Mistral, Phi, CodeGemma), AI Application Development
- Data & Analytics: NumPy, Pandas, Scikit-learn, Data Analysis, Data Visualization
- Tools: Git, GitHub, Visual Studio Code, Jupyter Notebook
- Concepts: Full Stack Development, Software Development Lifecycle, Automation, REST APIs, Problem Solving

INTERNSHIPS

AI/ML Software Development Intern — Besant Technologies | 1 Month

- Worked on machine learning concepts and model integration for AI-based applications.
- Assisted in developing and testing machine learning models for real-world use cases.
- Gained hands-on experience in implementing AI solutions and model evaluation techniques.

Data Analytics Intern — Besant Technologies | 1 Month

- Performed data analysis using Python and data analytics tools.
- Worked with datasets to extract insights and support data-driven decision-making.
- Gained practical exposure to data handling, preprocessing, and visualization..

AI-Powered Django Full Stack Development Intern — Mevi Technologies | 1 Month

- Developed web applications using the Django framework.
- Worked on frontend and backend integration for full-stack applications.
- Implemented AI-powered features and contributed to application testing and deployment.

PROJECTS

BugHunt AI – LLM-Based Code Debugging Tool

- Developed an AI-powered debugging tool to detect, analyze, and resolve programming errors using Large Language Models (LLMs).
- Integrated local LLMs including Mistral, Phi, and CodeGemma for code generation, optimization, and bug fixing.
- Applied prompt engineering techniques to improve debugging accuracy and automate developer workflows.

AYA Desktop Assistant

- Developed a voice-controlled desktop assistant using Python for system automation and task execution.
- Implemented speech recognition and AI-driven command processing for hands-free interaction.
- Automated desktop operations and application control using Python libraries and system-level integrations.

Vocal ID – Voice-Based Gender Classification Web Application

- Built a machine learning web application to classify gender from voice recordings.
- Implemented audio preprocessing, feature extraction, and predictive modeling techniques for accurate classification.
- Integrated the trained machine learning model with a web interface to provide real-time predictions.

CERTIFICATIONS

- AI-Powered Django Full Stack Application Development — Mevi Technologies
- AI/ML Training Program — Besant Technologies
- Data Analytics Training — Besant Technologies
- Virtual Reality Using AI — SWAYAM
- Research Paper: “The Role of Autonomous AI Chatbots in Modern Automation”
